DESCRIPTORS: \*Propionic acids. Acids. Polarization.  
\*Pyridines. \*Ethyl ethers. Ethers. Organic solvents.  
Dielectric properties

Experiments indicated that an increase of polarity does not have a favorable effect on the course of the acid-base reaction since the reagents react strongly with the solvent molecules. A considerable increase of proton-donor and proton-acceptor properties of the solvent can, however, lead to ionization. This is
